Core Services We Offer

Fundraising, Capital Advisory & Financial Writing

- Advisory on raising capital through bank finance, private equity, SME IPOs, and private investors
- Guidance on book building processes for IPOs and private placements
- Strategic advisory on capital structuring, equity-debt mix, and promoter holding optimization
- Preparation of Detailed Project Reports (DPRs), investor decks, financial models for banks, investors, regulatory bodies, and institutional credit evaluation
- Structuring of financial content for clarity, compliance, and institutional credibility

Core Services We Offer

Internal Audit, Due Diligence & Litigation

- Design and implement internal audits focusing on control effectiveness, fraud prevention, and regulatory compliance
- Assess governance structures, SOP compliance, and risk mitigation strategies
- Analyze business processes to eliminate inefficiencies and apply lean accounting and cost-saving practices
- Achieve guaranteed cost savings by streamlining tasks and reengineering processes
- Evaluate revenue sources, customer concentration, and vendor dependencies to identify legacy issues affecting scalability
- Provide advisory on financial automation, represent clients before tax authorities, and draft legal submissions for audits and assessments.

Global services

For High-Net-Worth Individuals (HNIs)

- Structuring overseas income to reduce tax liabilities by leveraging international tax systems and minimizing exposure
- Guidance on double taxation treaties and the effective use of foreign tax credits to minimize taxes
- Specialized support for NRIs regarding Indian investments, including strategies for repatriating Indian assets and structuring investments
- Ensuring compliance with global financial regulations such as FATCA, CRS, and local reporting obligations for foreign investments
- Offering regulatory advice and conducting thorough due diligence for overseas property acquisitions, ensuring compliance
- Helping with foreign asset disclosures under both Indian and international laws, while assessing risks associated with offshore investments

For Corporate

- Assisting with setting up business entities in strategically chosen international jurisdictions to optimize global operations
- Establishing multi-currency global banking accounts and payment gateways for smooth international transactions
- Offering guidance on setting up optimal tax-efficient structures, including nominee and holding company structures, ensuring transparent beneficial ownership disclosures

- Managing statutory audits, preparing financial statements, and ensuring compliance with local regulatory filings and tax returns across different jurisdictions
- Providing advisory services on IFRS, GAAP, and local accounting standards to ensure compliance in multinational operations
- Providing advice on managing currency risks, integrating offshore and onshore operations, and assisting with financial modeling for international ventures

Finance & Accounting Solutions

- Tailoring accounting systems to match the scale, industry, and operational needs of the business
- Conducting ratio analysis, managing working capital, and monitoring fund flows to optimize financial health
- Compiling CMA data for institutional credit assessments and board-level presentations
- Redrafting financial statements to meet the requirements of IPOs and institutional investors
- Revising previous financial accounts to comply with SEBI, MCA, and exchange guidelines
- Transitioning from outdated accounting systems to modern ERP platforms and updating legacy systems for full compliance with IPO and regulatory standards
